|---|---------------------------|---------------------------------------|
| <b>S. No.</b>                           | <b>EQUIPMENT</b>          | <b>Utilization<br/>UG/PG/Research</b> |
| 1                                       | B-H Curve Tracer          | UG                                    |
| 2                                       | Dielectric Constant Kit   | UG                                    |
| 3                                       | Digital Gauss meter       | UG/PG                                 |
| 4                                       | Diode Laser               | UG                                    |
| 5                                       | Helium Neon Laser         | UG                                    |
| 6                                       | Advanced Laser Kit        | UG                                    |
| 7                                       | Fiber Optic Kit           | UG                                    |
| 8                                       | Holography Viewer Kit     | UG                                    |
| 9                                       | Michelson Interferometer  | UG                                    |
| 10                                      | Spectrometer setup        | UG                                    |
| 11                                      | Ultrasonic Interferometer | UG                                    |
| 12                                      | CRO                       | UG                                    |
| 13                                      | i5 PC                     | Research                              |
